

In the coming weeks, M.C. TEC will participate in the Solids Antwerp exhibition...

You are very welcome to visits us there!

*Click on the above logo for more information about this exhibition.*

Our colleagues Richard Prins and Remko van der Leeden will be present to answer your questions and advise you.

### **Solids Antwerp (booth A028) 17<sup>th</sup> & 18<sup>th</sup> of October 2018**

Companies specialising in **processing, storage and transport of dry bulk goods** will present their innovations **on the 17<sup>th</sup> and 18<sup>th</sup> of October 2018 at Solids Antwerp**. This exhibition is part of the Solids European Series: the leading trade fairs focusing on the **powder industry and bulk industry**.

Solids Antwerp is the only trade fair in Belgium for the entire bulk sector. This **successful two-day network platform** takes place in Antwerp Expo for the tenth time.

At this show we will present our moisture measurement solutions in addition to brix and concentration measurements.

We would be happy to discuss any process and measurement challenges you might have which we can potentially help you with, and are always interested to receive feedback regarding the operation of existing equipment and industry specific news. We will be exhibiting and demonstrating various devices at this show so very much hope you will find time to **visit us at our stand (A028)!**

Click on the above logo for more information about this show.

## Introduction LP series Refractometers for Brix, Fresh Brix and CO-2

Maselli is most recognised for inline refractometers but they have also been supplying laboratory refractometers for well over a decade. Now Maselli have introduced their new line of laboratory analysers for the beverage and beer industry.

The LP series make it possible to automatically measure **Brix, Fresh Brix, Original Extract, Real Extract, Alcohol and CO-2** values from a can or a bottle.

This is a modular system which is versatile and simple to use and configure. We would be happy to tell you more about this system at the solids exhibition or send you the brochure on your request.

M.C. TEC BV is a key supplier of high-tech measurement instruments for process and laboratory analysis. Our customer are the industry, research center and government. Quality, customer satisfaction and service are very important for us. We would be happy to send you more information about our company and product range. We would also be happy to make an appointment and advice you further about our possibilities. Don't hesitate to send an e-mail to [info@mctec.nl](mailto:info@mctec.nl) for more information. A visit at our website will also give you additional information about our delivery program: [www.mctec.nl](http://www.mctec.nl).

Unsubscribe can be easily done by sending an email to [ah@mctec.nl](mailto:ah@mctec.nl) with the subject "unsubscribe newsletter".
